

The floor plan shows a pentagonal suite with a complex perimeter. The top edge consists of a horizontal segment and two angled segments meeting at a sharp peak. The left edge is composed of three angled segments. The bottom edge features a long diagonal segment, a short angled segment, and a final short angled segment meeting at a sharp point. The perimeter is detailed with multiple parallel lines and small square markers, likely representing doors or windows. The interior is a large, open space.

**Suite # 340**
